RAW Sockets

Aim:-

To Write a code using RAW sockets to implement packet sniffing.

Code:-

```
import socket

s = socket.socket(socket.AF_PACKET,
                  socket.SOCK_RAW,
                  socket.ntohs(3))

print("Sniffer started. Press ctrl+c to stop.")

while True:
    packet, addr = s.recvfrom(65535)
    dest = ":".join("%02x" %b for b in packet[0:6])
    src = ":".join("%02x" %b for b in packet[6:12])
    print("Sorce MAC:", src)
    print("Destination MAC:", dest)
    print("----------")
```

Linux/Ubuntu ⇒ sudo python3 sniffer.py

Input:-

network packets

Output:-

Packet sniffer started.—

Packet received from : 192.168.1.5

packet received from : 192.168.1.1

Packet received from : 192.120.183.14

Result:-

The RAW socket sniffing program was successfully implemented & network packet was captured & displayed.
